FULL STACK DEVELOPER · 3-5 YRS EXP

June 2025

Dear Hiring Manager,

I am writing to express my strong interest in a **Full Stack Developer** position at your organization. With 3–5 years of hands-on experience building scalable, production-ready web applications, I bring both the technical depth and the collaborative mindset needed to contribute meaningfully from day one.

My core stack — **React, Next.js, TypeScript, and PostgreSQL** — has been the foundation of every product I have shipped. I have built full-stack applications end-to-end: designing relational database schemas, architecting RESTful APIs, and crafting responsive, accessible front-end interfaces that users actually enjoy. I am equally comfortable reasoning about a query plan in PostgreSQL as I am fine-tuning a React component's performance.

Most recently, I developed a full-featured e-commerce platform using **Next.js 16 with Turbopack**, integrating a PostgreSQL backend via a connection pool, building an admin dashboard with role-based authentication, and deploying the application to production. This project sharpened my ability to debug complex issues — from SSL connection timeouts to Turbopack cache corruption — and reinforced my belief that great engineering is as much about persistence as it is about skill.

I am a fast learner who thrives in environments where quality is taken seriously. I write clean, typed code, take ownership of my work, and communicate clearly with both technical and non-technical stakeholders. I am excited by the opportunity to grow alongside a team that ships thoughtful software.

I would welcome the chance to discuss how my skills and experience can contribute to your team's goals. Thank you sincerely for your time and consideration.

Warm regards,

Ugwu Chukwuma Emmanuel

Full Stack Developer
